Sixt Car Sales takes the used-car process to a new level: the Carly Enterprise app delivers data-based insights on defects, mileage, vehicle identity, and battery health across all brands – in minutes, right at the vehicle. Purchasing decisions become faster, more objective, and more profitable – at every location.

THE CHALLENGE

×

Hidden defects lead to bad buys

Without digital diagnostic data, hidden defects, manipulated mileage/VINs, or degraded batteries stay undetected – with direct impact on margin, return rate, and reputation.

×

Classic diagnostic tools fall short

Too slow, too expensive, too complicated – or without reliable results. Fast, confident buying decisions are impossible.

SOLUTION: CARLY ENTERPRISE APP

01

Digital vehicle inspection in minutes

Carly reads all relevant control units – fault codes, mileage, VIN, battery SoH. Bad buys are avoided; fair purchase prices become verifiable.

02

Seamless integration into existing workflows

Diagnosis runs in parallel with the purchasing process – no waiting, no separate steps. Instant decision confidence on site.

03

Flexible use without fixed costs

Ready to use instantly, mobile, no prior knowledge needed. Diagnoses only when needed – no expensive devices, no per-user license fees.

1

Connect the adapter

Plug in the OBD adapter, open the app – plug and play, no training.

2

Start the diagnosis

All relevant control units in minutes – right at the vehicle.

3

Decide & document

Digital test report (PDF) – instant, verifiable confidence.

SIXT CAR SALES STRENGTHENS BUYING & SELLING THROUGH GREATER TRUST

Precise, on-demand diagnostics maximize profitability – no hardware costs, no unnecessary testing effort. Full transparency creates measurable trust: **more margin, more revenue, more loyalty.**

* Platform value from Carly Enterprise customer projects (risk detection before purchase).
